

BOUBACAR BARRY

AI Strategy and Governance | Organizational Transformation | The Judgment Layer for AI Adoption

Salt Lake City, Utah | +1 801 888 1963 | bokar83@gmail.com | linkedin.com/in/boubacarbary

PROFESSIONAL SUMMARY

I sit at the intersection of two things almost nobody has done together: I point production AI systems at real problems, and I have been involved in HR and organizational transformation at scale inside a global company. Ten years of my career sat in global HR leadership inside GE: GE Healthcare, then GE Gas Power out of Atlanta as HR Business Partner for a global engineering organization, and most recently four years based in Dubai with GE Vernova, after GE split into three public companies in 2024. Most organizations do not struggle with AI. They struggle with unclear work, unclear decisions and unclear leadership, and AI only exposes gaps that were already there, so closing those gaps before deployment is what makes adoption stick.

- Since 2025 I have designed and operated a self-hosted multi-agent AI system that runs my business day to day, governance playbook written before it went live.
- Designed an AI-enabled HR dashboard inside GE that took a six to eight hour reporting process down to a ten minute workflow.
- Helped lead the global Kaizen that moved average time to fill from around 60 days to under 30 on the portion we completed.
- HR Business Partner to close to 1,500 people across almost every country the business operated in, plus a North America team of roughly 200 to 400.

I am not an engineer. I taught myself enough code to understand how the machine works, not to become one, but to bend it to what the work needed. What I own is the architecture and the judgment: which specialized agent picks up research and which one drafts, which model earns which task and what it is allowed to cost, and the rules for what the system may never do without a person signing off. Nothing runs unattended until it has passed a five-voice review and been pressure-tested by Claude and ChatGPT arguing over the same decision.

SKILLS

- Multi-Agent AI Systems Design and Operation
- AI Strategy, Adoption Frameworks, Governance and Workflow Orchestration
- AI Output Safety Review, Anomaly Monitoring and Human-in-the-Loop Design
- HR Analytics, Dashboards and Decision Systems
- Organizational Design, Organizational Development and Operating Model Transformation
- Global Workforce Planning and Workforce Strategy
- Change Management and Adoption across Multi-Country Environments
- HR Business Partnering, People Operations and Employee Relations

PROFESSIONAL EXPERIENCE

Catalyst Works | AI Strategy and Operations Advisor, Applied AI and Organizational Design | Salt Lake City, Utah **2025 - Present**

- Design and operate a self-hosted multi-agent AI system, running Ubuntu 24.04 and Docker, with CrewAI orchestration, n8n as the automation layer, LiteLLM model routing across OpenRouter, and PostgreSQL as the core data layer.
- Wrote and maintain the AI governance playbook the system operates under. It was written before the system went into daily use, not added afterward once something went wrong.
- Built the safety layer into the first version: output anomaly scanning, harmful content flagging, and named points where a decision has to come back to a person.
- Designed disagreement into the system on purpose. A five-voice review panel pressure-tests any significant decision from five distinct angles, and two frontier models run in parallel as a live cross-check on every major output.
- Route every task to an appropriate model rather than the most expensive one, treating cost, latency and quality as explicit design choices instead of defaults.

GE Vernova (GE Gas Power) | HR Business Partner (HRBP), MENA Services and ITR | Dubai, UAE

2021 - 2025

- Designed and deployed an AI-enabled HR dashboard that cut a 6 to 8 hour manual reporting process to a 10 minute workflow. That was automation delivered inside a large organization, on its systems and under its constraints.
- Helped lead the global Kaizen that began rebuilding the company hiring process, moving average time to fill from around 60 days to under 30 on the portion we completed.
- Elevated HR from execution to strategic partnership across 14 countries in the Middle East and North Africa, redesigning people systems and decision frameworks during large-scale transformation.

- Helped deliver the global HR Skills Initiative as a member of the enterprise HR Transformation team, and integrated AI into my own HR workflows, sharing those working methods informally with HR colleagues across the business.
- Managed a multi-million dollar headcount budget for the MENA Services population, balancing hiring pressure against morale, burnout risk and service-delivery quality, and partnered with business leaders to keep their own budgets, including travel spend, on track.

GE Gas Power | Senior Employee HR Manager / HR Business Partner (HRBP), Power Services Engineering | Atlanta, Georgia **2017 - 2021**

- Owned HR Business Partner responsibilities for close to 1,500 employees across almost every country the business operated in, while serving as Senior Employee HR Manager for a North America team of roughly 200 to 400.
- Co-led restructuring of the services portion of the global engineering organization into a unified One Services Engineering operating model.
- Co-led the redesign of the Gas Power Services Engineering organization structure and built the multi-year workforce plan for the new organization during years when budgets were tight.
- Managed a multi-million dollar headcount budget through that same growth period, balancing hiring pressure against morale, burnout risk and service-delivery quality, and partnered with business leaders to keep their own budgets, including travel spend, on track.
- Led and co-led cross-functional projects and teams at both the GE Vernova and enterprise GE level, including leadership of colleagues more senior than me in the organization.
- Developed a performance visibility model to strengthen promotion and readiness discussions, and advanced pipelines that produced senior-to-executive promotions.
- Founding member of the HR Culture Ambassadors program and served as its Team Lead across all of GE Gas Power.

GE Healthcare | HR Leadership Program (HRLP) | Issaquah, Washington; Milwaukee and Madison, Wisconsin **2015 - 2017**

- Covered the site HR lead role on an interim basis at a 400-person unionized plant that manufactured anesthesia machines and mother-and-infant-care products, handling employee relations investigations and the issues between the union and leadership.
- Walked that plant floor multiple times a day, because I did not believe I could support people I never saw.
- Led restructurings, engagement initiatives and manager coaching across union and non-union plants, affecting engineering and Global Supply Chain teams.
- Designed global tools to strengthen manager capability and conducted cultural diagnostics across Sub-Saharan Africa.
- Helped lead the redesign of the GE employee survey and represented GE Healthcare on the enterprise corporate team.

The RBL Group | Project Coordinator / Associate Principal, HR Consulting **2010 - 2013**

The HR strategy firm co-founded by Dave Ulrich.

- Coordinated major leadership development projects across Africa and the Middle East: survey administration, logistics and feedback facilitation.
- Contributed to the design and delivered the training for a multi-year, \$500K leadership development program at a multi-million dollar international company in Mauritius, tracked impact over multiple months and presented results to senior leadership, the chairman and the board.
- Coached senior leaders using 360 assessment tools and built delivery processes that supported adoption and long-term capability growth across client organizations.

EDUCATION

Master of Business Administration (MBA), Organizational Behavior and Human Resources | BYU Marriott School of Business **2013 - 2015**

Hawes Scholar, Eccles Scholar

Bachelor of Arts, Communications (Public Relations) | Brigham Young University

CERTIFICATIONS AND LANGUAGES

Facilitator certifications: Leader as Coach, Courageous Conversations, GlobeSmart, Team Coaches, Smart Simplicity

Languages: English, French, Haitian-Creole, Fulani, basic Spanish

ADDITIONAL EXPERIENCE

- Rio Tinto (Kennecott Utah Copper) | HR Intern | 2014 - 2015
- GE Healthcare | HRLP Intern, Business Development | 2014
- Integra Telecom | Customer Account Manager | 2009 - 2010
- Brainstorm, Inc. | Sales Associate | 2008 - 2009
- B2 Communications | Owner and Consultant, Guinea | 2006 - 2007
