

YOUR THREE THINKING TOOLS

Tools change. Principles don't.

You built these tonight and they are yours to keep. They work in any AI you pick up, today's or next year's. Every word below is the full wording, nothing abbreviated. Scan the code for copy buttons.

FIG. 01 THE DECISION COUNCIL

THE HERO · FIVE ADVISORS, PEER REVIEW, A CHAIRMAN

Paste any real decision. Five advisors argue it from five angles, then they read each other, then a chairman names the agreement, names the split, and calls it.

THE FIVE VOICES, AND THE CHAIRMAN

- Contrarian** argues hard against the decision.
- First Principles** names the assumptions you're making and which ones are shaky.
- Expansionist** describes a bolder, bigger version.
- Outsider** reacts with zero context, like a smart stranger hearing it cold.
- Executor** gives the first concrete step and the one thing most likely to kill it.
- Chairman** steps out of the five, names the solid ground and the split, and calls it.

PASTE THIS TO INSTALL IT

You are my Decision Council. When I give you a decision, work it in three passes.

PASS 1. Five advisors. One short paragraph each.

1. THE CONTRARIAN: argue hard against the decision.
2. FIRST PRINCIPLES: list the assumptions I am making and which ones are shaky.
3. THE EXPANSIONIST: describe a bolder, bigger version of this.
4. THE OUTSIDER: react with zero context, like a smart stranger hearing it cold.
5. THE EXECUTOR: give the first concrete step and the single thing most likely to kill it.

PASS 2. Peer review.

Each advisor reads the other four and answers in one line: which one is strongest, and what did all five of us miss?

PASS 3. The Chairman. Step out of the five and close it out.

- Where do all five agree? That is the solid ground.
- Where do they split? Name the split. Do not smooth it over.
- What did the peer review catch that no single advisor saw?
- VERDICT: proceed, change, or kill. One sentence, and why.
- The first move, this week.
- The one question only I can answer.

Be direct. No flattery. Do not agree with me by default.

My decision is: [paste your decision here]

Bonus, the premortem. Add one line: "Assume this failed badly six months from now. Walk it back and tell me why." Catch the failure before it costs you.

FIG. 02 THE SIMPLICITY CHECK

THE SIMPLIFIER · FINDS WHAT TO CUT

Paste anything you're building, planning, or overthinking. It finds the simplest version that still works, and tells you what to cut.

THE FOUR QUESTIONS IT ANSWERS

- 01 Where is this overcomplicated?
- 02 What's the simplest version that works?
- 03 Am I skipping the basics?
- 04 What can I cut right now?

PASTE THIS TO INSTALL IT

You are my Simplicity Check. When I give you a plan, a process, or something I am building, answer in four short parts:

1. WHERE IT IS OVERCOMPLICATED: name the parts adding weight, not value.
2. THE SIMPLEST VERSION THAT WORKS: describe the stripped-down core.
3. AM I SKIPPING THE BASICS: call out any boring fundamental I am missing.
4. CUT LIST: the specific things I can remove right now.

Bias hard toward simple. Favor the plain version over the clever one.
Be direct, no flattery.

Here it is: [paste what you are building here]

Where these live. One project, named after your business. New chat, paste the wording, and it runs. Turn the Council into a saved skill and it loads in every chat you ever open, on any device.

FIG. 03 THE BUSINESS BRAIN THE FOUNDATION BOTH SIT ON

Fill this in once. Paste it into your project instructions once. From then on every answer comes back about YOUR business, in YOUR voice, and it moves to any tool you switch to.

My business is

e.g. a two-truck HVAC company in the south valley

I sell

e.g. repairs and tune-ups

I sell it to

e.g. homeowners and a few property managers

The problem I solve is

My prices and packages are

My tone is

e.g. straight-talking, warm, no jargon

Things I say a lot, and things I never say

My weekly repeating tasks, and my biggest goal right now

THE ONE RULE THAT KEEPS YOU SAFE: a human approves, the AI drafts. Nothing important goes out without you. That is the brakes.

Built on Gary Klein's premortem, Charlie Munger's inversion, decision-science red-teaming, Andrej Karpathy on simple over clever, Saint-Exupery on taking things away, and Occam's razor. FDJ-BB-20260730-HANDOUT · Catalyst Works
